Cemetery Mapping

Why Map Cemeteries in GIS?

- Preserves historical cemetery records
- Captures knowledge base of seasoned staff
- Provides centralized access to the records
- Consistent placement and management of graves
- Provides real-time picture of cemetery capacity
- Enables citizens to easily find loved ones

How is Wightman Different?

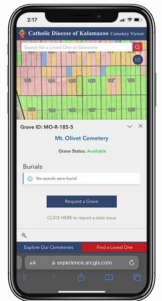

Our main goal is to keep it simple! Our software solutions are focused on cemetery records management and mapping, which means you can bring your own existing license of Esri's ArcGIS. Wightman is a Michigan based full-service firm for all your cemetery needs including:

- Cemetery records and map digitization
- High-accuracy GPS data collection
- Secure cloud-based cemetery records management software
- Site planning and cemetery expansion design
- High-resolution Drone imagery capture
- Ground Penetrating Radar (GPR) surveys
- Monumentation

Cemetery Software Highlights

→ Public Cemetery Map

- Citizens can find your cemeteries and their loved ones using a mobile device
- Request graves next to their loved one through a grave request form
- Report data discrepancies and mapping errors

→ Internal Cemetery Management Software

- Your staff can browse digital cemetery maps and records
- Manage cemetery records including new sales, interments, and related documents
- Quickly filter and focus records for easy management
- Visualize cemetery operational insights through dashboards
- Manage public grave requests and inquiries
- Create work orders to communicate with staff and manage cemetery tasks
- View, update, and create new cemetery records using your mobile device

Benefits & Features

- Cloud-based with access from anywhere on any device
- Utilize your existing Esri GIS software
- Securely store cemetery records, documents, and photos
- Quickly search your entire cemetery records database
- Gain valuable insights into your cemetery operations
- Quickly visualize and understand cemetery capacity
- Make quick and informed data-driven decisions
- Provide the community with easy online access to the cemetery maps and records
- Allow the public to find loved ones, explore availability, and request a grave site
